25X1

[redacted] Comments.

- (1) These refrigerator cars and express train coaches are reparations deliveries for the U.S.S.R. and are accompanied by the wheel sets required for the Soviet track railroad system on special flatcars. The European-gauge axles are returned to the Soviet Zone of Germany.
- (2) These deliveries to the uranium mining syndicate may possibly be used for purposes not connected with uranium ore mining (border fortifications?)
- (3) Fuel deliveries from Soviet Zone hydrogenation plants to the U.S.S.R. and returning empty railroad tank cars.
- (4) Grain shuttle trains which are scheduled to run until mid-July.
- (5) European-gauge axles for German freight cars returned by the U.S.S.R. to the Soviet Zone of Germany and for which the DDR reimburses the U.S.S.R.
- (6) It appears that shuttle trains composed of refrigerator cars are perhaps scheduled to operate for the shipment of meat as in the fall of 1950.
- (7) These items are believed to be part of the recently observed operation of sending empty gondola cars from the Soviet Zone of Germany to the U.S.S.R. The purpose of this operation has not been determined.
